RE: Fish and Wildlife Agency Culture Survey Data for Georgia Wildlife Resources Division

As part of the America's Wildlife Values Project, Georgia Wildlife Resources Division participated in a survey of agency culture that measured employees' perspectives on fish and wildlife management and the culture of your agency. In particular, the survey looked at:

- Characteristics of your fish and wildlife agency
- Management priorities of your agency
- Processes for public & stakeholder inclusion in decision-making
- Employee perspectives on management and culture
- Wildlife Value Orientations of employees

Data were gathered in the Georgia Wildlife Resources Division using an online survey in May and June of 2018. All permanent full-time employees were offered the opportunity to participate. In total, **206** usable responses were obtained, for a response rate of **55%**.

Attached are descriptive statistics outlining responses to each of the items on this survey and a list of complete comments provided by respondents in response to open-ended survey questions. In addition to this report, you will also receive a copy of the dataset used to run these analyses. You will notice that many demographic variables have been removed from this dataset to protect the anonymity of respondents, as promised in the original solicitation email and as required of us by law.

A report on our findings comparing culture across state fish and wildlife agencies and linking to public data through the America's Wildlife Values study will be sent to you separately in the fall.

We thank you for your help in this important research. If you have any questions regarding this state report, please contact Leeann Sullivan, the project's research assistant, at leeann.sullivan@colostate.edu.

Question Text: *Managers are often forced to choose between competing demands for fish and wildlife management. We are interested in knowing, in general, how you view the priorities of your agency. Assuming a hypothetical situation in which only one management option was possible, we want to know how you believe your agency would prioritize different goals and objectives. Please respond to the following series of questions by picking one of the two response options for each comparison.*

Table 3: Employees’ perspectives on fit within agency culture

	<i>Strongly Disagree</i>	<i>Slightly Disagree</i>	<i>Neither</i>	<i>Slightly Agree</i>	<i>Strongly Agree</i>

Question Text: *We want to know about the ways in which you personally identify with your agency. Please indicate the extent to which you disagree or agree with the following statements by selecting one response for each.*

Table 4: Employees' views on public and stakeholder participation

At what level do you believe your agency...	Non-participation	Education	Consultation	Representation	Partnership	Delegation	Complete Control
... currently includes the general public in decision-making?	1.0%	6.2%	41.2%	32.0%	10.3%	6.7%	2.6%
... currently includes paying stakeholders in decision-making?	4.2%	2.6%	17.7%	31.8%	28.1%	9.4%	6.3%
... should include the general public in decision-making?	0.5%	4.1%	35.7%	36.7%	16.3%	4.6%	2.0%
...should include paying stakeholders in decision-making?	4.3%	5.9%	26.6%	39.9%	18.1%	4.8%	0.5%

Question Text: Please indicate your answer to each of the following questions using the numbers listed next to each "rung" on the ladder (image below).

Public participation in decision-making has been conceptualized by researchers as a "ladder" with the bottom rungs representing minimal public involvement and the upper rungs representing significant opportunities for the public to shape decision-making, as described below.
